

Cambridge Saab- News Letter

A Spark of electricity appears at Cambridge Saab with the arrival of the Chevrolet Volt...European Car of the Year

*The Chevrolet Volt heralds the start of a motoring revolution

Why not make your appointment to meet the Chevrolet Volt....the Electric Car with extended range. Volt is neither a traditional hybrid nor a battery electric vehicle. Powered electrically 100% of the time, Volt can keep going when its lithium-ion battery is depleted, thanks to its on board petrol generator, extending its range to over 300 miles on a single charge

Why not experience this new technology first hand...to book your test drive call Luke or James at Cambridge Chevrolet on 01223 873499
